MOLDED TRAY BLANKS

CUSTOM MACHINED TRAYS

If you need a JEDEC OUTLINE MATRIX TRAY for handling and shipping your custom IC packages, and can't find a custom molded tray – look to our:

MACHINED MATRIX TRAY SYSTEMS

These trays are molded and stocked in four standard blank configurations, then CNC machined to provide custom pocket dimensions to safely handle and protect your packages.

Features:

- JEDEC Standard Thin Matrix Tray Outline
- Low Temp and High Temp, carbon fiber filled materials available
- Designed for low volume requirements
- 1-2 week lead time is typical for custom orders
- Close tolerance repeatability, CNC machining
- Pocket can be designed to handle many different package styles including: QFP, FP, BGA, LGA, CGA, and more.....

Pricing: For standard pocket designs. Special designs or engraving may require additional costs.

<u>TRAY P/N</u>	<u>Pockets</u>	<u>Temp.</u>	<u>Material</u>	<u>Machined</u>	<u>Blank</u>
